LARS BENEDETTO
SOFTWARE ENGINEER

👤 ABOUT

I love designing and building software. I focus primarily on the server, though I also enjoy building Android apps.

💼 WORK EXPERIENCE

March 2019 – Pres

Software Engineer
Too Good To Go is the world's number 1 app for fighting food waste.
Highlights

- Build features for other backend developers. Example: SNS/SQS integration for message sending. Redis for distributed caching. Spring Aspect annotations to allow other developers to easily inject complex functionality
- Build endpoints for the frontend to use
- Write and maintain Unit and Intergration tests

January 2020 – December 2020

DevOps Engineer
Too Good To Go is the world's number 1 app for fighting food waste.
Highlights

- Manage our AWS infrastructure via the Web UI and Terraform
- Build testing and deploy pipelines with Jenkinsfiles
- Manage Helm charts
- Manage and monitor Kubernetes cluster via ArgoCD and Rancher

October 2018 – June 2019

Android Developer
Too Good To Go is the world's number 1 app for fighting food waste.
Highlights

- Build new features for the Android App
- Kotlin, Coroutines

May 2018 – August 2018

Software Developer
Firecracker Software is a United States company that makes word games for iOS, Android, and the Web
Highlights

- Build the native Android GDPR system for use in all previous and future products
- Wrote mini-games in C++ for integration into new game
- Collaborate with artists to design UI and UX of new game

October 2016 – May 2018
